

### Working Bee Update for the Weekend of 20.09.08 - 21.09.08

A quick up-date on the last working bee held last weekend. Unfortunately it was a short session as most parents and grandparents needed to be home for the Verhovyna concert on Sunday. The weather is warming up although a little rain during the day on Saturday. A smaller attendance as expected, but nevertheless a productive day's work.

*Ian Hermence has done a great job on getting our new tractor operational. Here assembling the engine head.*

*With a new heart Ian is test driving the workhorse ready to give it a good engine flush and fill her up with clean water and rust inhibitor.*

*An old veteran who just cannot stay away from the place Michael Jury finishing the shower cubical in POMICH.*

*Here another veteran lending a hand Pavlo Senjov mixing tiling glue.*

*The expression says it all. Replacing a faulty sump pump in the kitchen septic is not a pleasant exercise. Only the strong can handle the discomfort. Well done Kon.*

*Some new faces. Larisa Wasył helping out in sorting out the kitchen, as it rarely gets attention  
Good to see you Larisa*

*Steve Jury and Nick Wasył have completed the roofing on the female toilet block. Anthony Wasył lent a hand as well. Great job lads. Now with some minor clean up inside it will be better than new.*

***Next working bee is scheduled for the weekend of October 4 - 5 for those whom are available.***

***There is still much work to be done in preparation for St. Michaels celebrations so please lend a hand and contact Andrew Lech on 0417 131 991 email [lech@cco.com](mailto:lech@cco.com)***
