

From the *Ashes a New Dawn Begins*. That's right a New Dawn Begins. Much has happened at Tabir over the past four weeks. GROCON have been to the Ploshcha and have demolished the burnt buildings. The Power Company has cleared dangerous trees from the power lines, and the bush is starting to show its brilliant colours again.

The buildings have been cleared and the Tabir is waiting for a new lease of life.

There are some hints of what was and the memories of bygones done by. The old stove from the first kitchen, a timely reminder of good fun time memories, laughter and strong friendships developed in years gone by.

The POMICH building is a reminder of what our community can achieve and that our future is awaiting us with greater determination, many new ideas and unprecedented enthusiasm.

There is much work to be done for the Oseredok, its ynatsvo and the wellbeing of our community. There will be a working bee scheduled for the ANZAC weekend. It will be back to basics, with no power, gas or luxuries we have become used too. The TARASIVKA toilet block is being refurbished and given a new life. There are plenty of trees on the ground that need to be cut and burned. There are bottles on ground which need to be cleaned up, after many years of being thrown into the bush. It is just shocking to see so many glass bottles everywhere.

The two lucky chairs which survived the inferno, stand proud and guard our ploshcha from further misfortune. When you visit your tabir, listen closely to the story they have to tell.

The building and ecology committees have been working together in putting a range of ideas forth for consideration. They are looking for a complete remodelling of your oselya from the river p to the Maroondah Hwy. A complete rethink of the way the oselya is to look and serve the Oseredok for the next fifty years.

The Uprava encourages ALL of its members to get involved in the rebuild. This does not mean just hands on at the oselya. We need assistance with fundraising which Andrea Ckuj is overseeing. We need people with architectural knowledge to assist in design, we need people with contacts for machinery such as a tractor, trencher, posthole digger. We need your membership payed up. Bottom line is that we are 1.2 Million Dollars short on our insurance payout and need to raise these funds. We NEED your help.

Ask yourself, what is this oselya worth to you, your children, your grand children? What is it worth to you and how can you help? Working bee's, fundraising, introduce us to people that may be able to help YOU.

Here are some more pictures to help you make up your mind.

Kitchen Duties.

Our Future.

Silly Times.

A Chapter Closes.

A New Dawn Begins.

New Opportunities.

Let Us Keep Those Memories

Remember the History Buried.

LET'S REBUILB TOGETHER!!!
